● ABOUT MYSELF

Professional Summary

Senior Frontend Developer with 4+ years of experience building **scalable SaaS applications** and **desktop solutions** using React.js, Next.js, TypeScript, and Electron. Skilled in component-driven development, UI/UX design, and performance-optimized architectures, delivering intuitive and responsive interfaces. Experienced in reusable frontend components, RESTful API integration, state management, and forms with React Hook Form. Proficient in Tailwind, Material-UI, and Ant Design, and maintaining CI/CD workflows with Docker. Collaborative, detail-oriented, and committed to delivering high-quality digital experiences

● WORK EXPERIENCE

APPLICATIONS, SYSTEMS AND PRODUCTS (ASP) – (SENIOR FRONTEND DEVELOPER) – MUHAMMAD NAYAB –
25/02/2025 – Current – FAISALABAD, AUSTRALIA

- **Led frontend development** for a desktop-based application using React.js, TypeScript, and Electron, delivering scalable, maintainable, and high-performance solutions.
- **Designed and implemented UI/UX** in Figma, translating complex business workflows into intuitive, user friendly desktop interfaces with responsive layouts and Ant Design components.
- **Developed reusable React components and custom hooks** using modern patterns (React Hook Form, Zustand) to enhance global state management, code reuse, and testability.
- **Integrated and consumed RESTful APIs**, leveraging Swagger for endpoint validation, request/response accuracy, and seamless frontend-backend integration.
- **Implemented CI/CD pipelines** with Docker-based containerization on AWS, automating build, testing, and deployment workflows for stable enterprise-level releases

GRIDSHIP – (FRONTEND DEVELOPER) – MUHAMMAD NAYAB – 24/07/2024 – 25/02/2025 – UNITED STATES

- **Frontend development for a SaaS platform** using React.js, Next.js, and TypeScript delivering scalable, high-performance user interfaces.
- **Designed and implemented user-focused UI/UX** with Adobe XD, translating complex business requirements into intuitive product experiences.
- **Developed reusable, maintainable frontend components** using modern React patterns, including custom hooks, and Redux for efficient state management.
- **Integrated RESTful APIs** and leveraged Swagger to validate contracts and ensure seamless frontend-backend communication.
- **Built responsive, production-ready interfaces** using Tailwind CSS, optimizing performance and consistency across enterprise-level SaaS workflows.
- **Collaborated cross-functionally with backend engineers**, and product stakeholders, ensuring frontend architecture aligned with business goals and scalability requirements.

EPTECK TECHNOLOGIES – (REACT.JS / NEXT.JS) – MUHAMMAD NAYAB – 09/05/2022 – 14/07/2024 – FAISALABAD, PAKISTAN

- **Developed scalable web applications** using React.js and Next.js, delivering dynamic, high-performance user interfaces.
- **Designed and customized IoT device dashboards in ThingsBoard**, focusing on data visualization and real-time monitoring.
- **Designed end-to-end UI/UX for web** and mobile applications, creating wireframes and interactive prototypes using Adobe XD.

- **Built cross-platform mobile applications** using React Native, translating designs into responsive, production-ready interfaces.
- **Integrated RESTful APIs** and utilized Swagger to ensure clear, secure, and well-documented frontend-backend communication.

FREELANCING (FIVER) – MUHAMMAD NAYAB – 20/11/2020 – 20/05/2022 – FAISALABAD , PAKISTAN

- Developed and customized **WordPress** websites using **Elementor** and **React.js**.
- Ensured cross-browser compatibility and **mobile responsiveness** of websites.
- Worked on dynamic features and user experience enhancements using **React** and **JavaScript**.
- Optimized **front-end performance** for fast load times and high user engagement.

● **PROJECTS**

Treply

Treply is an AI-driven SMS marketing and customer communication platform that enables businesses to create, automate, and manage personalized text messaging campaigns. As a frontend developer, I contributed to building an intuitive, responsive, and high-performance user interface that allows users to manage campaigns, contacts, and analytics seamlessly.

Smartknit

SmartKnit is an RFID-based IoT solution that tracks industrial orders and monitors machine and operator data in real-time, displaying insights on dashboards.

Key Features:

- **Real-Time Monitoring:** Continuous tracking of machine performance and operator activities.
- **Order Tracking:** Monitors industrial order progress from start to finish.
- **Dashboard Visualization:** Displays data analytics and performance metrics.
- **RFID Integration:** Ensures accurate tracking and data collection.

● **SKILLS**

React JS | Next JS | TypeScript | Docker | Github | Tailwind CSS | SASS | Gitlab | JQuery | HTML5 | Bootstrap | Postman | Swagger | Ant Design | Material UI | AWS | Adobe XD | Figma | Wordpress | Thingsboard | JavaScript | react native

● **EDUCATION AND TRAINING**

11/11/2015 – 14/12/2019 Faisalabad , Pakistan
BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY (BSIT) University of Agriculture, Faisalabad

18/11/2012 – 15/10/2014
FSC. PRE-MEDICAL Superior College

18/10/2010 – 17/11/2012
MATRICULATION Green Dots School

● **LANGUAGE SKILLS**

Mother tongue(s): **URDU**
Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B2	C1	B2	B1	B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user
